

## Coadd™ FL-3077

Leveling Agent

### DESCRIPTION

**Coadd™ FL-3077** is a non-silicone high molecular polymeric leveling agent, and is suitable for solvent-borne and solvent-free coating systems. The product can effectively provide long-wave leveling, and significantly improve the film gloss, prevent cratering. The product has defoaming functions, with no adverse effect on film gloss. It also has excellent compatibility with various resins.

### PHYSICAL PROPERTIES

Appearance	Colorless to light yellow liquid
Density (g/ml)	1.07
Active content (%)	52
Viscosity (25°C, mPas)	<5000

Note: These properties are only typical, and do not represent product specifications

### APPLICATION CHARACTERISTIC AND ADVANTAGES

**Coadd™ FL-3077** is recommended for solvent-borne and solvent free coating systems. The product can effectively improve the film leveling and gloss, reduce cratering, while also have defoaming effect. No adverse effect on inter-layer adhesion.

Suggested dosage (based on total formulation): 0.2 – 2.0%

Above dosage are only for orientation, optimum level of dosage should be determined via laboratory tests.

### SAFETY NOTICE

Before using the products, please refer to SDS for detailed safety data, handling and storage procedures recommended.
