

## **Coadd™ TB-6135**

### **Tannin Block Additive**

#### **DESCRIPTION**

**Coadd™ TB-6135** is a soluble mixture additive base on aluminum zirconium phosphosilicate, and is suitable for wide range of water-borne wood and furniture coating systems. The product can effectively block tanning stain, instead of using zinc oxide. Therefore improves the in-can stability of coatings. The product has good compatibility with variety of system.

#### **PHYSICAL PROPERTIES**

Appearance	Clear to yellowish liquid
Density (g/ml)	1.14
Active content (%)	30
Viscosity (25°C, mPas)	<500

Note: These properties are only typical, and do not represent product specifications

#### **APPLICATION CHARACTERISTIC AND ADVANTAGES**

**Coadd™ TB-6135** is recommended for water-borne wood & furniture coatings. The product has excellent tanning stain blocking properties, it is good soluble and comparability with waterborne resins, can be used in clear or colorful coating formulations. It is suggested to add in the let-down stage, with sufficient shear forces ensure to achieve good dispersing in the system.

The suggested dosage is typically 1 – 3% based on the total formulations. Optimal dosage levels are determined through series of tests.

#### **SAFETY NOTICE**

Before using the products, please refer to SDS for detailed safety data, handling and storage procedures recommended.

#### **DISCLAIMER**

It is common proposal for product usage and demand above information based on our professional knowledge. Due to environmental uncertainty and out of our control from practical process, please test and make evaluation ahead of use to ensure efficient and safe. For your reference, the above information is only for commonly known and use the product. It is guaranteed to meet quality and product specification.
