

## Coadd™ TB-6136

### Tannin Block Additive

#### DESCRIPTION

**Coadd™ TB-6136** is an ammonia free organic Zirconium chelated composite. It is very effective for tannin blocking properties in coating formation, and eliminate the tannin stain. It is suitable for wood and furniture coating systems, without need special binder for most tannin blocking performance. Low odor and VOC free.

#### PHYSICAL PROPERTIES

Appearance	Clear to yellowish liquid
Density (g/ml)	1.2
Active content (%)	30
pH	9 ± 1

Note: These properties are only typical, and do not represent product specifications

#### APPLICATION CHARACTERISTIC AND ADVANTAGES

**Coadd™ TB-6136** is recommended to use in primal coatings on wood substrates. It is not affect on the key performance of coating formulation with good stability.

Suggested to add in the let-down procedure, sufficient shear forces ensure to achieve good dispersing in the system. Crystallisation may occur when temperature is below 20℃, please warm up and mix until all crystal dissolves before use.

The suggested dosage is typically 1 – 5% based on the total formulations, and optimal dosage levels are determined through series of tests.

#### SAFETY NOTICE

Before using the products, please refer to SDS for detailed safety data, handling and storage procedures recommended.

#### DISCLAIMER

It is common proposal for product usage and demand above information based on our professional knowledge. Due to environmental uncertainty and out of our control from practical process, please test and make evaluation ahead of use to ensure efficient and safe. For your reference, the above information is only for commonly known and use the product. It is guaranteed to meet quality and product specification.
